

**WEST CUMBRIA  
RIVERS  
TRUST**

## Boilerplate

West Cumbria Rivers Trust is an award-winning environmental charity dedicated to protecting, restoring and improving West Cumbria's blue spaces for the benefit of wildlife and the people living and working around them. The Trust's work includes improving water quality, enhancing habitats to improve wildlife diversity and reducing flood risk. Education sessions are run for schools, teaching the next generation about the importance of our environment. The Trust's team is supported by volunteers who donate almost 3.5k hours of their time every year.

The Trust is a registered charity and relies entirely on public donations, grants and fundraising to carry out its work. It is independent but works closely with partners such as the Environment Agency, Natural England, numerous charitable and environmental organisations and private companies and individuals to deliver maximum benefit.

West Cumbria Rivers Trust is proud to be part of the Rivers Trust movement, one of 60 local river trusts across UK and Ireland.
